LA 10/24-27/65 & 10/30-31/65 - misc notes

10/26/65 en route San Diego. Left LA 10/25

Steve, did none of the things I asked of him in advance re writing & by phone, including no investigative efforts (Hall, Howard, Patrick, etc) - not ~~even~~ even a plea to sleep. A sweet girl ~~named~~ called, actually, Charley Brown, took over the [illegible] which great handicaps of his location & did rather well under the circumstances. When, late the night of my arrival, she learned I'd had no place for me to stay, she offered me the couch in her living room & I have stayed until today. She was ill, passed out in her doctor's office Fri. p.m., but never stopped worrying about the missed opportunities. Very pretty, very pleasant - but also living up on private life - broken marriage, divorce, etc, at 24, & starting with a 4-year-old girl, Jamie - who is quite precocious.

She neither met me at the airport nor had anyone else do it - chatted non-stop all the way from there, which I did during the [illegible] by phone. Because Jim Lawrence knew, he went to Detroit. Art Rubin [illegible] to have planned today

He will probably meet me with Wolf & maybe
Lyle from Rice [illegible] appointment to see
me on Wed., if it is now possible.

It is possible that Dr Wolf's failure to
communicate by his post is all accept, was
a ploy because of what it made possible -
a two-hour phone conversation with
Dave Lifton that night and a later
personal meeting with Steve Jaffe,
who was undermined as did Steve B,
while D up to dirty $ Dave.

Di revealed many of the details of Dave
concept & exploitation of Ann Thornley business,
which seems to include Dick Billings
very promiscuously. What they have
done is to add a little product of an
effort by Affiliated Advertising the wildest
imagination & the most unimaginable wrong
conclusions. Billy love me responsible for Spurgeon's
unrest in Thornley, his indictment. even his
press release. Gave Dave more than enough for
him to check Thornley "honesty", of which he
speaks much. He apparently is depending on
RTO word & Billings' reading by this
misinterpretation. I told him about the memo, &

in detail, of the Open City picture of what really happened at Cleveland Hall, of LHO relationship with Barbara & his trust in her - and her kindness to him - which was new to him.

He offered to send me some of his drawings, showed him, he claims to have interviewed S.S. agents & to have documentary proof of a White House conspiracy - involving LBJ & Allen Dulles & a series of secret meetings in Texas the week before the assassination. At Security Who came later & stayed until 4 a.m., ~~told~~ told me an earlier version but it ~~was~~ was inserted by Dulles. He also said that recently Dave was still talking about those incredible ~~papers~~ papers - he writes now.

Jim Lawson has a witness, a waitress waitress, on tape, identifying LHO as the man who was a "Lee Oswald" Lincoln Card with her.

But has met her woman who identifies Shaw as a man she saw entering Bradley's home - also on tape - to send me dude.

told Jim + Art Osborne significance.

Jeff supplied an account of Bobby's apparent to see him right before ass assin. after his being arrested by Brantley. Art says M. has been underwriting serving Ray Mitchell but that he had earlier, in D.C. seen him + Hedinsky, in D.C, + that they had hoped at his insurance st. to speed with his interpretation of it. No date but approx. year ago.

Steve Said he had worked through a Bobby-lawyer Ron Buck + a former KTS producer Dick Lubic. This account Lubic - quoting KTS type + words in RFK - is not what Art says. But says he is a kid who got fired + was only a mountain ranger to work KTS. But does not trust him.

Steve Says Lubic has RFK assassination pictures. He also identifies another photographer in the tape as a man who, as a stringer for ABC, got volunteer movies just before ass. He + Ted have seen them + think they see something suspicious in an on-stage photographer not taking pictures - only assisting to.

The story does not impress me. The photographer is said to be wearing a dark jacket & beard. They seem to think he is one ~~of~~ of our own. Charley Bevan is the source on this. They appear not yet to have seen Yarrow, to see if he is the guy. Charley also said other witness ~~seem~~ seem to show this photographer with a sweater, not as Ted seems to have seen him.

One copy of this film seems to have been stolen from a locker at UCLA. Jeffe says they saw a "working print."

Jeffe is trying to make an appointment for me to see Lubic on Wednesday when I return to LA. Asked Art to go along. They are said to have agreed to pay close to $11,000 & when they did, the price went up first to $12,000 & then to $13,000. The story ~~seems~~ seems to lack what it was, but they do say they have some $ to stake they have received thereby. I did not see them.

I also told me of his conversation w his lawyer. He would have shown me a copy, which he said he had in the car, but he had to leave to get

to a store then about to close. He will show it to me Wed. He says he is impressed by Brockdon + will send me copies of his files. He quotes B as saying Frank Stroyd is "full", I am inclined to think pip pulled some thing like that, and stayed Monk Hines account as his hope for me.

If the Hepburn book, he says the plan is to issue a suit, which will force the material out in the book and in the open. In short, the book is built for a suit. He says he first got word, & Monk Mowrer broke in Mexico City, but it would get an NO. But would, on close study, become clear. It then arrives in a plain envelope, no return address, no insurance. He also quotes Hepburn and/or his associates as having a low opinion of J. J., which seems to me to be in consistent with placing firm trust in him. He is out of the country to France, the agency is the H Bureau. He says those he met are "real guys" He kept using such words as "excellent" "very fine" Important, in a way I have often heard him talk, but one that is not always easy to see.

Alice gives the impression of being absolutely confident of Hoffman & Bachelors but I get the impression I took with a bit of his personality.

Returning to Mrs Buck - Lubic story, he says that during this period he & Jean were together at Palm Springs when Shaun Lubic & Jean talked on the phone to say what is available, in it, is probably what I had under suggestion he was on this Bobby attitude. But the weakness was in Lubic, on whom it all depends. Again according to Jaffe, Lubic himself, saying he was in SF & in Bobby's room with Bobby there, & that when he got to LA Bobby would see them. She says that in LA Manfredi said they would have nothing to do with the subject until it after the election."

What Chet has is that on coming to KHJ-TV Lubic gave exaggerated accounts of his extensive business & perhaps financial interest that turned out to be fictitious. However, on that does have a relationship to current reading. He gave me a Lubic and reading "Coke Confidential". It is a

subsidiary of the Gyro-Dynamics Corporation, with address 9 on Sunset Blvd. Steve had made several references to a "9 on Building", that Buck's office was in it also. I now seem to recall that the call from Palm Springs was to Buck not Lubie.

Lubie & Buck is supposed to have planned Saturday in P.C. to entertain him & to have relayed what people had told him in a three-hour conference. Saturday is said to have been a little disappointing by what Buck & L. had hoped to have said he considered Gemini a ~~not~~ not & on this basis to have refused to do any flying.

The flight was a "stretch" DC-8, very long, & it seemed an effort until took off — I hope. We were late taking off when I awakened early in the a.m, turned the radio, & got San Diego. KFMB. It reported eight feet closed & also some superhighways. I called Lindbergh on which Fl. 103 I was scheduled, & they reported only the most minor delays. We made an approach at San Diego six feet &

Then took off again, full power, then circled for a while, then returned to L.A. as we were almost ready to touch down there, where the smog also was heavy, we full-powered again & the pilot announced an airport in the San Diego area was clear & we would land there. The hostess later, in the return flight to the L.A ~~area~~ airport was closed as we were about to land. We broke it through the very obvious mountains to Miramar Naval Air Station. Apparently a radar landing. Could see nothing past of this point, as I believe it must have been at least an 80 mile approach. It was an unusual flight! The runway was very long, apparently to accommodate the very large planes that carry the Atlas missiles from this area. It took four buses to transport the 223 passengers of this one plane. The flight is one of a half hour. My bag pulled away from the plane 3 hours after scheduled landing time, for the commercial ~~Atlas~~ airport
